SUMMARY

Strong foundation in computer science, data structures, and algorithms. Experienced in building and deploying full-stack applications using React, Next.js, Spring Boot, Supabase, and SQL. Strong problem-solving skills with 650+ LeetCode problems solved and achievements in competitive programming contests. Passionate about developing scalable, enterprise-grade solutions.

EXPERIENCE

Nexverse

Sep 2024 – Apr-2025

DSA HEAD

Delhi, India

- Led a team of 10+ members, mentoring in algorithms, data structures, and competitive programming.
- Conducted 10+ coding sessions and meetings for problem-solving, boosting technical preparedness for contests and interviews.
- Personally solved 650+ LeetCode problems, applying algorithmic concepts to practical challenges.

PROJECTS

Strive OS - Productivity & Analytics Platform | React 19, Spring Boot, Recharts, Framer Motion | [\[Code\]](#) | [\[Live\]](#) **May 2026**

- Solo-developing a comprehensive personal management operating system, decoupling a responsive React frontend from a robust Spring Boot REST API.
- Designing dynamic habit tracking and scheduling modules, utilizing Recharts to process and visualize complex user data into interactive analytics dashboards.
- Implementing secure JWT authentication and fluid Framer Motion animations to deliver a premium, app-like user experience.

EaseStay - AI-Powered Community Management SaaS | React, Supabase, Groq AI (LLaMA 3.1) | [Code](#) | [Live](#) **Apr 2026**

- Led a hackathon team to develop a next-generation PG management platform, personally architecting the entire backend infrastructure and database schema using Supabase PostgreSQL.
- Built end-to-end user data flows, secure authentication, and real-time notification systems, seamlessly linking the backend to the React frontend.
- Integrated Groq LLaMA 3.1 with native browser Speech Recognition to create a voice-first reporting system that automatically triages and categorizes maintenance emergencies.

Code Arena - Competitive Programming Platform | React, Spring Boot, MongoDB, Judge0 API | [Code](#) | [Live](#) **Dec 2025**

- Co-developing a full-stack competitive programming environment, taking full ownership of the frontend architecture using React 19, Vite, and Tailwind CSS.
- Engineered an interactive DSA learning hub with Framer Motion visualizers and integrated the Judge0 API for real-time execution of C++, Java, Python, and JavaScript code.
- Designed backend MongoDB schemas for user profiles and coding problems via Spring Boot, establishing secure RESTful endpoints and linking them to the React client.

TECHNICAL SKILLS

- **Languages:** Python, C++, JavaScript, Java, SQL, HTML/CSS
- **Web Development:** React.js, Next.js, Tailwind CSS, Framer Motion
- **Databases:** Supabase (PostgreSQL), MongoDB, SQLite, MySQL
- **Backend & API:** Spring Boot, RESTful APIs, JWT, Groq AI / Google GenAI
- **Tools/Platforms:** Git/GitHub, GitHub Actions, Linux
- **Core Concepts:** Full-Stack Development, Database Management, System Architecture, Object-Oriented Programming

EDUCATION

IITM ,Guru Gobind Singh University

2023 – 2026 (Expected)

Bachelor of Computer Application (GPA: 9.5/10.0)

Delhi, India

ACHIEVEMENTS

- [\[Certificate\]](#) Winner – Code of Duty Competitive Programming Contest (2024)
- [\[Certificate\]](#) Winner – Project Competition on AI/ML in Python (2025)
- Solved 650+ problems on [Leetcode](#)
